

High Legh – Autumn 2018

# GREEN VIEW

## Welcome to the Autumn Green View

You know, I find it strange that the Conservatives—the only political party in the UK that promotes fracking—never wants to mention it. They want to change the planning laws to make drilling for shale gas Permitted Development—without any set back distances from homes and schools. They would rather you did not know.

I want to challenge that.

## HS2

With plans ongoing, the route has already been altered to take account of historical salt mining around Northwich with potential unstable geology. This in an area licensed for fracking associated with seismic activity. Geologists have warned of fracking over historical mining areas.

I want to challenge this.

# Green Belt

Our Green Belt cannot be trusted with our current leaders—The Campaign to Protect Rural England has identified enough brownfield sites for over half of proposed Green Belt housing development in Cheshire East.

I want to protect our green belt from plans like the Cheshire Gateway and the wrong housing in the wrong place.

We need more social housing in our towns and cities closer to amenities. Affordable homes in our villages and sheltered housing for our elderly in the communities they have lived in for many years. Instead we get profit before people. I have lived and campaigned in the ward for many years. Next year I will be standing again to be a Green Voice in Cheshire East Council and

look to serve the interests of the people of High Legh ward. I want to stand up for our environment and wildlife, not just help you get compensation when your homes are affected by HS2 or fracking.
